Vishvajeet Nayal
Developer and Programmer

specializing in Flutter and app development, leveraging my proficiency in creating robust and visually appealing mobile applications. With a strong foundation in data structures and algorithms (DSA), I can optimize app performance and ensure efficient code implementation.
Additionally, I have a comprehensive understanding of programming languages like C, C++, and Java, allowing me to develop versatile software solutions across various platforms.

9

EDUCATION

Ryan International School
HSC/Intermediate

Did Schooling from Ryan International School , Greater Noida. Scored 94% in 10th and 90% in 12th

Vellore Institute of Technology
B Tech

Currently pursuing B tech degree in computer science(core) at VIT Vellore

PROJECTS

Mobile application using flutter for hackthon
This project was created as a hackathon submission. we created an mobile application using flutter and firebase where students can rate faculty's notes and can refer to best quality notes accordingly

Web Scrapper using Python
created a web scrapper using python , which would detect change in prices , discounts and stocks

AI model using Python and Open CV
an AI model which leverages the power of libraries like openCV to detect collision and prevent accidents

Virtual Assistant using python
using python and libraries created a virtual assistant which would recognize speech and perform tasks such as sending e-mail , deleting flies etc.

Chat Application using Flutter and Firebase
created a chat application where users can form communities and talk to each other. Flutter was used to create frontend that can be used on both android and ios devices. Firebase was used as the backend(Baas - Backend as Service)

VOLUNTEER EXPERIENCE

Created a website using html ,css and javascript for a local business
frontend enginerer
